The environment, sustainability and the transition to a circular economy are important themes in Belgium and Portugal. Our two countries face many challenges in their efforts to ensure a sustainable future. The aim of this seminar is, on the one hand, to take note of developments and results in Flanders and Belgium and, on the other hand, to take note of developments and results in Portugal. Through the mutual transfer of knowledge and information, we want to see where future opportunities for cooperation between our countries can exist.
